***Preliminary Amendment***

Applicant's preliminary amendment, received March 18, 2005, has been noted. In particular, claims 1-38 have been canceled leaving only claim 39 pending in the application. It is noted that claim 39 in the instant application is identical to the originally filed claim 39 in the parent application, US Serial No. 10/016,266.

Applicant also submitted a preliminary amendment on September 2, 2003 to amend the first line of the specification. This amendment should be updated to provide the most current status (i.e. US Patent Number) of the parent application.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 39 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Russian Patent No. 1,727,802.

The Russian patent was addressed during prosecution of the parent application, US Serial No. 10/016,266. In particular, the Russian document discloses inserting a cryoprobe into a disc for freezing of the disc for removal. The only step not expressly taught by the Russian document is the specific time of treatment. The examiner maintains that such a treatment procedure would inherently be within the broad time range set forth in applicant's claim 39, or at least would be obviously within such a range as deemed necessary by the operator during a specific procedure.

Art Unit: 3739

Claim 39 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sluitjer et al (5,571,147).

Sluitjer et al disclose inserting a cryoprobe into an intervertebral disc for treatment (see Abstract and columns 2-4). The only feature not expressly taught by Sluitjer et al is the specific treatment time. The examiner maintains that the treatment time for using the Sluitjer et al device would inherently be within the broad time range set forth in applicant's claim 39, or at least would be obviously within such a range as deemed necessary by the operator during a specific procedure.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 39 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 39 of U.S. Patent No. 6,613,044. Although the conflicting claims are not identical, they are not patentably distinct from each other because the specific use of the device to treat selected tissue is deemed to be an obvious, if not inherent, function of the system.
